- |   |  |   |
|---|--|---|
|  12 months plus 3 months EPA |  Blended online and face-to-face learning |   |
|  Primary and secondary       |  Funding available                        |  Pathway tutor supported |

## Develop your skills and confidence

Our Postgraduate Teaching Apprenticeship will help you to:

- Gain qualified teacher status (QTS) through on and off the job training
- Develop deep knowledge and understanding of your chosen phase and subject
- Develop practical teaching skills, ideas and activities to use in the classroom
- Gain knowledge of schools through working as a member of a school team
- Develop the ability to reflect critically and think on your feet

## Apprenticeship funding available

Apprenticeship levy paying schools can get full funding, with non-levy paying schools contributing just 5% of costs!

The screenshot shows a user interface for a learning module titled 'Developing Metacognition'. At the top, there is a search bar with the text 'What do you want to learn?'. Below the search bar is a banner image featuring a young girl looking thoughtful, with various educational icons like a lightbulb, a magnifying glass, and the letters 'A+' overlaid. The main content area is divided into sections. On the left, there is a green header for 'Developing Metacognition' followed by a paragraph: 'Please view every section of content to complete this session. You may also contribute to discussions and share ideas and experiences, if you wish.' To the right of this are two course cards. The first is 'Introduction' with a small icon and the text 'View this object for full points - (+1)'. The second is 'What is Metacognition?' with a small icon and the text 'View this object for full points - (+1)'. On the far right, a circular callout box highlights the 'Developing Metacognition' section with a green header. Inside this callout, it says: 'Metacognition is at the heart of the science. It is a powerful key to accelerated pupil progress, creates truly effective and reflective learners: feel like a nebulous concept, but this session shows you how to apply metacognition to your class.' Below this text, a green progress bar indicates 'Learning Experience Completed 13/9 XP'.

## Learn online and in your school

On our Postgraduate Teaching Apprenticeship you'll follow a weekly phase and subject specific training plan that will ensure you're making the most of learning experiences in and outside of school. You'll be supported by an experienced personal pathway tutor who will provide you with regular feedback on your progress and coach you on subject knowledge and teaching skill development. 20% of your week will be dedicated to online subject specific and professional studies training. You'll receive 12 months of training followed by a 3-month End Point Assessment (EPA) period.

## To join our programme you'll need to:

- Be employed/have an offer of employment in a school
- Be assigned an in-school mentor who will support you throughout your apprenticeship
- Have achieved a standard equivalent to grade 4 in GCSE English language and mathematics (and science if you're training to teach at primary level)
- If you've taken a GCSE equivalency test in maths or English, we can support you to take your functional skills level 2 during your apprenticeship
- Hold a first degree from a UK higher education institution or equivalent qualification at 2:2 or above
